DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

3. (currently amended) The method of claim 1[2], further comprising the steps of:

receiving an encoded inbound fourth message over the single, shared wireline path;

decoding the encoded inbound fourth message through employment of the inbound-message CDMA code to obtain a replacement inbound-message CDMA code;

and

replacing, after a pre-determined time interval, the inbound-message CDMA code by the replacement inbound-message CDMA code to increase communication security of one or more additional inbound messages.

Allowable Subject Matter

2. Claims 1, 3-20 are allowed.

Regarding Claim 1, Squibb does not teach the combination of:

encoding a third message through employment of the outbound-message CDMA code to create an encoded outbound third message that comprises, a replacement outbound-message CDMA code; and

sending the encoded outbound third message over the single, shared wireline path to request a replacement of the outbound-message CDMA code by the replacement outbound-message CDMA code to increase communication security of one or more additional outbound messages.

Regarding Claim 13, Squibb does not teach the combination of:

the first network component sending, after a pre-determined time interval, a third message encoded through employment of the first CDMA code, of the plurality of CDMA codes over the single, shared wireline path to the one of the one or more additional network components;

wherein the third message comprises a third CDMA code, of the plurality of CDMA codes, for replacement of the first CDMA code.

Regarding Claim 19, Squibb does not teach the combination of:

means in the one or more media for encoding a third message through employment of the outbound-message CDMA code to create an encoded outbound third message that comprises a replacement outbound-message CDMA code; and

means in the one or more media for sending the encoded outbound third message over the, single, shared wireline path to request a replacement of the outbound-message CDMA code by the replacement outbound-message CDMA code to increase communication security of one or more additional outbound messages.
